History of Changes/Updates to NOAA Tide Predictions

[Click here for 2012-present Tidal Prediction Updates \(/tide_pred_stn_history.html\)](/tide_pred_stn_history.html)

Previously Published Tide Tables

[Click here for previously published Historic Tide and Tidal Current Tables \(/historic_tide_tables.html\)](/historic_tide_tables.html)

Search Help

The station search can find Tide Prediction stations by name, station id, or by latitude/longitude.

- **Station Name**

Enter a minimum of 3 characters of a station name to retrieve a listing of stations containing those exact characters in their name. The more text entered, the more precise the search will be. Entering the name of a state will return all station in that state. Similarly, entering the name of a region or sub-region will return the stations in that group.

- **Station Id**

Station Ids are 7-characters long and may contain letters and/or numbers. Most Station Ids are all digits and follow the "Cutter" geographic numbering system. You may enter a partial station id, as long you provide at least 3 characters on which to search.

- **Latitude, Longitude**

Examples: Lat/Lon search should be entered in +/- decimal degree notation:

- 38,-76
- +38, -76
- +38.1, -76.2
- -30, -120.07
